Sun, the prime source of energy and confidence for all life on earth, has come under Rahu's shadow today as it shifts signs and moves from Scorpio (Vrishchik) to Sagittarius (Dhanu). In this sign ruled by Jupiter four planets, Surya, Rahu, Mars and mercury are now in a potentially very harmful yoga. Many people will have to suffer from the negativity arising from this combination of planets.

The effect of this combination on the average human being can range from serious health problems, death of elderly people in near relations, difficulties related to finances and banking, false rumours or allegations against oneself, to unwanted and unexpected confrontations with total strangers. Some people may also suffer harm through animal attacks or accidents related to animals.

On the social and global front, the wikileaks issue will get murkier with the interested parties making more mess of the situation and burning their own hands in their attempts to malign the opposition. Governments across the globe will lose favor in eyes of the people and banking systems stand to suffer big losses from this combination of planets. Members of the media, the journalists and the opinion leaders will act quite irresponsibly and the people's confidence in them will also falter.

The main intensity of this combination will be till 23rd December 2010 when Mercury gets out of it as it retrogrades back to Scorpio. Then, another relief when Mars gets out as it enters Capricorn on 8th January 2011. And, finally Sun leaves Sagittarius to enter Capricorn on 14th January 2011. That will be the time when things will start showing some meaning and the guilty will actually be punished instead of the bush-beating which is going on nowadays.

The effect of the transits in next one month on the twelve moon signs and ascendants will be as follows:

1. Aries - Mesh: Long distance unexpected and uncomfortable travels, health problem to children, students studying abroad will face problems regarding their education, health problems like joint pains and respiratory disorders to self.
