On 14th April 2011, Sun has entered Aries, its sign of exaltation. And, two days after that, on 16th April 2011, Venus too entered its Uccha Rashi, Meen (Pisces). Both these mutually harmful and totally diverse planets will leave their exalted states in the second week of May 2010. Venus leaves Pisces on 11th May 2011 and Surya leaves Mesh on 15th May 2011.

The other interesting transit is the retrograde motion of Mercury in Pisces, its sign of debilitation. It will prevent Venus from showing the full extent of its usually beneficial results in Meen Rashi. Four planets are together in Pisces - Mars, Jupiter, Venus and Mercury.

In next three weeks we can expect more incidents of air crashes and other vehicular mishaps on land, water and air. A few famous celebrities, actors of yore, and some other popular figures, of a good old age, may leave their physical bodies after living a fulfilling life.

Crime against women and other sexual crimes will see a rise. Some strict rules and regulations may be imposed on the industries related to porn and prostitution. The peoples' movements seen in various nations will suffer setbacks as the greed and backstabbing become the order of the day.

Natural calamities like landslides, earthquakes and cloudburst have a high chance of occurring in next three weeks, especially in the second week of May 2011. At the same time forest fires and other fire related incidents will also be on a rise all over the world.

The planetary transits as of today are as under:
